DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP10248721A. The JP10248721A reference discloses applicant's claimed subject matter except for such a design feature of an actuating mechanism which is provided at a joint between the upper portion and the lower portion. It would have been an obvious matter of design choice to have modified the reference to be capable of such a claimed design choice wherein an actuating mechanism which is provided at a joint between the upper portion and the lower portion for allowing the upper portion to move up and down with respect to the lower portion, since applicant has not disclosed that such a design choice solves any stated problem and it appears that the invention would perform equally well. The remaining limitations would then have been obvious design choices only.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
